Here's a great home on about half an acre in the Salem community. Improvements made in 2003: central heat/air - kitchen redone - and carport enclosed (could easily be a 4th bedroom or office/additional living area). The metal roof was put on in 2009 and the windows are 6 or 7 years old. You can relax on the covered patio while the kids play in the large fenced back yard. There is a big storage building and a peach tree, grape and blackberry plants. This home qualifies for RD financing. Better take a look today!
